

Academia Internacional David
Robotics and Technology
2nd Trimester
Appreciation Summative # 1
8th A & B

Name: _____ **Date:** _____ **Group: 8° A B**
Teacher: Porfirio Rios **Score: _____ / 40pts**
Safe Build Teamwork

Criteria	9	7	5	2
Safe material use	Handles kit, parts, wiring, power and ground, and LED direction safely.	Uses materials safely with one minor reminder.	Needs reminders for handling, wiring, or testing.	Unsafe handling or no safe build evidence.
Teamwork and roles	Shares build, code, test, and recorder roles responsibly.	Usually shares roles and communicates respectfully.	Roles are uneven or need several reminders.	Does not participate responsibly.
Build challenge evidence	LED or button build is tested and documented with a diagram or photo.	Build evidence is mostly complete.	Build evidence is partial or hard to check.	Build evidence is missing.
Organization and perseverance	Keeps parts organized, troubleshoots, and leaves station ready.	Mostly organized and keeps trying.	Organization or perseverance needs support.	Workspace or troubleshooting evidence is poor.
Criteria	4	3	2	0
Punctuality, Readiness & Respect	Files were delivered on time to Google Classroom, the student was prepared to work, and had necessary resources, e.g. computer, charger, email, and password.	Files were delivered on time, with only one minor readiness or resource issue.	Files were submitted, but there was a noticeable lateness, readiness, or resource problem.	Files were not delivered on time to Google Classroom, the student was not prepared to work, or did not have the necessary resources, e.g. computer, charger, email, and password.

Comments:

Safe Build Teamwork Evidence Questions

Use evidence from the Arduino/Freenove build practice. Your answers should support the appreciation grade.

Student	Name: _____
Partner / team	Name(s): _____
Build practiced	☐ LED circuit ☐ button circuit ☐ other: _____
Safety checks	☐ power disconnected while wiring ☐ 5V and GND checked ☐ LED direction checked ☐ wires checked before upload/testing
Roles used	☐ builder ☐ coder ☐ tester ☐ recorder
Build evidence	I documented my circuit with: ☐ diagram ☐ photo ☐ notes ☐ test result
Safe habit	A safe build habit that prevented or fixed a problem was _____ _____ _____ _____
Next step	Next time, our team should improve _____ _____ _____ _____

Teacher: Porfirio Rios **Score: _____ / 40pts**
Arduino Perseverance

Criteria	9	7	5	2
Perseverance during testing	Keeps trying through wiring, code, or upload issues and records result.	Usually keeps trying and records result.	Needs support to keep testing or explain.	Stops without useful testing evidence.
Organization of evidence	Diagrams, code, photos, notes, or tests are organized.	Evidence is mostly organized.	Evidence is partial or hard to check.	Evidence is missing.
Feedback and improvement	Uses feedback or a checklist to improve build or code.	Uses feedback for a basic improvement.	Feedback or improvement is unclear.	No feedback response or improvement.
Integrated practice challenge	Builds and tests one challenge with one input and one output.	Challenge mostly works.	Input, output, or test result is incomplete.	Challenge evidence is missing.
Criteria	4	3	2	0
Punctuality, Readiness & Respect	Files were delivered on time to Google Classroom, the student was prepared to work, and had necessary resources, e.g. computer, charger, email, and password.	Files were delivered on time, with only one minor readiness or resource issue.	Files were submitted, but there was a noticeable lateness, readiness, or resource problem.	Files were not delivered on time to Google Classroom, the student was not prepared to work, or did not have the necessary resources, e.g. computer, charger, email, and password.

Arduino Perseverance Self-Reflection Questions

Use evidence from Arduino testing, feedback, and improvement. Your answers should support the appreciation grade.

Student	Name: _____
Problem I kept working on	The Arduino problem was _____ _____
Evidence used	☐ diagram ☐ code ☐ photo ☐ Serial Monitor/test note
What I changed	I changed or checked _____ _____
Feedback/ checklist	Feedback or checklist item used: _____ _____
Result	After the change, the circuit/code _____ _____
Next step	Next time, I should _____ _____
