

Academia Internacional David
Robotics and Technology
1st Trimester
Summative Activity 3

Name: _____ Date: _____ Group: 3rd A B C
Teacher: Edgar Pitty Score: _____ / 40pts

Criteria	7	5	2
Interest and Attitude	The student shows strong interest in the activity, works with a positive attitude, and stays focused throughout the task.	The student shows some interest and generally works appropriately but may need reminders to stay focused.	The student shows little interest or has difficulty staying engaged in the activity.
Following Instructions	The student follows the activity instructions carefully: checks the robot, makes adjustments if needed.	The student follows some instructions correctly but misses steps or needs frequent help.	The student has difficulty following the instructions even with support.
Effort and Perseverance	The student shows consistent effort, tests the activity several times, and keeps trying to improve or correct the work.	The student shows some effort but may stop easily or depend too much on help.	The student shows little effort and makes very few attempts to complete or improve the activity.
Skills and Participation in the Activity	The student participates actively and demonstrates good practical skills while testing the program and modifying the code.	The student participates and demonstrates basic skills but has some difficulty completing parts of the activity.	The student participates very little or shows major difficulty during the practical activity.
Understanding and Individual Response	The student answers the individual question clearly and shows good understanding of the activity	The student answers partially and shows basic understanding, but with some confusion.	The student gives a very limited answer or shows little understanding of the activity.
Criteria	5	3	
Punctuality, Readiness & Respect	The robot was assembled during the given time. No mayor flaws with the functionality and built quality of the robot. The robot follows the same standards as in the manual.	The robot was assembled after the given time. Some flaws with the functionality and built quality of the robot need improvement. The robot almost follows the same standards as in the manual.
